RE: Construction of Driveway Approach

The Madera County Road Department, by order of the Madera County Board of Supervisors, requires that an asphalt or concrete approach be constructed and approved by the Road Department prior to the final inspection on the building construction.

Attached is an application for the Encroachment Permit to allow the CONSTRUCTION OF THE APPROACH. Please remit the **\$90.00** fee for the permit along with the application for the encroachment as soon as possible. **No inspection will be done on an approach until the permit fee has been paid.** A permit will be issued stating the type of approach to be constructed along with the standards for asphalt or concrete. **If applicant should elect to construct a concrete approach, the forms must be inspected by the Road Department prior to pouring.** Upon completion of the asphalt or concrete approach a final inspection must be made by the Road Department Encroachment Inspector.

If applicant is unable to complete the construction of the approach prior to final inspection of the structure a **\$3,880.00 per approach deposit** may be made with the Road Department until such time that the construction of the approach can be completed. An Encroachment Permit is required prior to the acceptance of the \$3,880.00 deposit.

Gary Bispham
Road Encroachment Inspector
